EUROCOPTER EC130 B4 IKC

Designed specifically for touring, the EC130 is a high-performance helicopter with a strong emphasis on passenger comfort. The spacious, air-conditioned cabin with raised rear seating offers breathtaking wraparound views, while the unique fenestron tail rotor minimises noise both inside and out.

Each of our aircraft has been further customised with a luxury leather interior, Bose noise cancelling headsets, and additional avionics for enhanced safety.

Safety features include: Fenestron tail rotor, emergency pop out floats, FADEC (full authority digital engine control), TCAS (traffic collision avoidance system), Pulse Lights, Real time satellite tracking system, Cell and Satellite Phones.
